Thank you for listening.

SHADY GROVE ADVENTIST HOSPITAL 2010
American anthropologist Margaret Mead once defined a city as a place where one finds “new voices to listen to and familiar ones to listen to again.” This simple, eloquent description captures the essence of our community — a place where people come together to live, learn, grow and connect.

Our community is rich and diverse and each one of us contributes in a special way to its growth and success. We here at Shady Grove Adventist Hospital are proud of the role we play — offering care and compassion to our neighbors when they need it most.

As a community hospital, we are committed to bringing the absolute best care to those we serve. In the past year, we have expanded our services to include state-of-the-art equipment and procedures that are not only new to our hospital, but new to the county and to the state. These advancements have led to life-changing outcomes for many of our patients.

Your support of our mission has made many breakthroughs in care possible. In the pages that follow, you will hear from our patients, in their own words, how you have truly made a difference to so many lives.

Sincerely,

Dennis Hansen
President
Shady Grove Adventist Hospital
And Each Voice Can Make A Difference

As engaged and active members of families, schools, churches and workplaces in our community, we know we can use our voices in many meaningful ways. We are parents, grandparents, teachers, employers, civil servants, caregivers. We cheer for our children in their sports endeavors, whisper words of comfort to friends in need, praise colleagues for a job well done, share insight and advice with clients and customers.

Here at Shady Grove Adventist Hospital, we use our voices to help our patients every day — encouraging them to take those important first steps after surgery, offering words of reassurance and comfort, explaining important components of care to loved ones, announcing the joyful birth of a new life.

We want to take this opportunity to say “thank you” for all you have done in support of our hospital. Your role in helping to further our mission has meant a great deal to the many members of our community who entrust us with their care.

With the opening of our Healing Garden this past year, we have furthered our commitment to healing not just the physical — but the whole person — with a focus on mental, emotional and spiritual support. Listening to the concerns, hopes and dreams of those we serve is an integral part of how we approach care.

The Healing Garden is a testament to what we can accomplish together. And there is more work to be done. Each and every one of us, through our individual gifts and passions, is vital to keeping our community healthy and vibrant. Our voices — collectively and individually — deserve to be heard.

Sincerely,

William H. Smith
Chief Development Officer
Shady Grove Adventist Hospital
As part of a vibrant community, we can come together as one voice to accomplish great things.

But each and every one of us also has our own individual voice.

And we all have something important to say.

At Shady Grove Adventist Hospital, we are inspired every day by our patients. What they do. How they live. Who they are. And what they have to contribute.

Here are a few of their stories. We hope they will inspire you, as well.
“I learned from a young age to be resilient and embrace my artistic side. You have to be creative to fight cancer.”

Vlada Kalutski was diagnosed with thyroid cancer at the age of fifteen. Born in Belarus in 1988, just two years after the Chernobyl nuclear power plant disaster, it is possible she was exposed to radiation in milk as a young child.

Vlada’s family came to the United States when she was just three years old, searching for a more stable, safe and productive life. They landed in Gaithersburg, MD, just ten minutes from Shady Grove Adventist Hospital. She later said, “I was incredibly lucky to have a leading expert in thyroid cancer so close.”

For the past seven years, Dr. Vijay Varma, Director of the Thyroid Program at Shady Grove Adventist Hospital, has been Vlada’s physician. She has undergone two surgeries and several rounds of treatments. There is now no evidence of the disease in her system.

Vlada recounts that she basically grew up under the care of Dr. Varma and his team. The Thyroid Program at Shady Grove involves a collaboration of expert physicians, oncology nurses specially trained in managing thyroid patients, and a Cancer Care Navigation Team. “Cancer was part of my life, my childhood,” Vlada says. “Dr. Varma made everything so easy for me. He listened to me. He made me feel comfortable, dealing with me as a child, on my level. I felt so blessed.”

Vlada recently graduated from the George Washington University with an undergraduate degree in International Relations. An accomplished violinist, she speaks three languages, and is now attending law school.

“I hope to work in international development, as a consultant. I want to make a difference.”
I am a mother.

“I was prepared for the possibility of twins. But my sonogram revealed a big surprise.”

When the sonographer announced a third heartbeat, there was pindrop silence in the room. Maheen Mazhar’s first thought was, “I have two hands, how am I going to do this?” The mother-to-be’s initial shock was quickly followed by elation…and some anxiety. As with any high risk pregnancy, she would be followed carefully. Bedrest was prescribed for three months.

“My doctor recommended I deliver at Shady Grove Adventist Hospital due to the sophistication of the Neonatal Intensive Care Unit (NICU),” Maheen explains. Soon, three beautiful, healthy girls were born. “The nurses who helped me were extremely caring. I will never forget them.”

The NICU at Shady Grove is rated a Level III-B, one of the highest ratings attainable. It is staffed around the clock by neonatologists and neonatal nurses. They are all trained and experienced in handling the most complex newborn situations including delivering twins, triplets and quadruplets.

Maheen and her husband named their daughters after prophets, representing three religions. Sarah, named after the mother of Isaac, represents Judaism. Maryam, named after Mary, the mother of Jesus, represents Christianity. And Aminah is named after the mother of Mohammed, representing Islam.

Now just over a year old, the girls “talk to each other in their own language,” according to Maheen. The house is full of delightful squeals and chatter. And the soothing, reassuring voice the girls know to be their mother.

“Life is very full. We have many, many blessings.”
I am a winner.

“I have always been very active. But progressive, severe arthritis in my hips made it painful to walk. Less than eight months after both my hips were replaced, I am back to playing tennis.”

Slowing down was simply not an option for Carolyn Deeley, a former investment banker, mother of three daughters, and captain of her tennis team. But debilitating arthritis began to change the way she lived her life. An avid tennis player, she had to give up the game she loved. “It was very upsetting,” she recalled.

Her physician, Dr. Sridhar Durbhakula, advised her of a new leading-edge tool available at Shady Grove Adventist Hospital, the Hana Table. Shady Grove is the first hospital in Montgomery County to use this specialized surgical table, which allows complete anatomical control and access to natural intervals between muscles, requiring a smaller incision and more separating of tissue as opposed to cutting. The new minimally invasive tool is a breakthrough in total hip replacement surgery.

“I was amazed,” Carolyn remembered. “I woke up and was in less pain than with my C-sections.” After just three days in the hospital, and one week at the Adventist Rehabilitation Hospital of Maryland, Carolyn went home. “I could go up and down the stairs right away. My pain level was very manageable.”

Amazingly, just three-and-a-half months after surgery, Carolyn was on a tennis court hitting balls with a ball machine. About four months after surgery, she slowly began playing with friends. In less than eight months after surgery, she was back competing in matches and feels like a winner.

“I remember my first match vividly. As I was running from the baseline to the net to get a shot, I made a mental note to once again thank Dr. Durbhakula. He had given me back my life.”
"Today's generation should look at the freedom and independence they enjoy and think about how they can serve their country."

According to his wife, Albert Katoski was never sick a day in his life. A pretty impressive feat for a man who has reached the age of 88. A father of five, grandfather of six, great grandfather of two and loving husband to his wife Jean for 65 years, Albert is spry and sharp. “Mr. Google,” as he is affectionately called by family and friends, joined the Army right out of high school. He later went on to earn a bachelor’s degree and an MBA and to work for the Central Intelligence Agency until his retirement. Albert is a proud recipient of a Silver Star, the third-highest military decoration that can be awarded to a member of any branch of the United States armed forces. He earned his Silver Star in 1945, an honor he received for helping an injured soldier to safety.

Certainly no stranger to pain, Albert remembers how excruciating the pain in his right side was on a recent afternoon. A call to Albert’s physician convinced Jean to immediately call 911. An aortic aneurysm had formed in Albert’s chest and extended into his abdomen — called a thoracoabdominal aortic aneurysm (TAAA) — and it was rupturing. A rupture of this type is usually fatal.

Vascular surgeons at Shady Grove Adventist Hospital, Dr. Jeffrey Wang and his partner, Dr. Robert Fox, were able to quickly and successfully perform Shady Grove’s first minimally invasive repair of a ruptured TAAA, a groundbreaking and complex procedure.

Discharged just 36 hours after surgery, Albert went home to rest comfortably. “Mr. Google” looks forward to sharing more stories about his life with family and friends.

“I am very proud of my service. I don’t know of a greater honor... other than honoring your wife.”
Do you have varicose veins or experience leg pain and fatigue?

You may have superficial venous reflux disease.

Leg Vein Anatomy

Vein Valve Failure

Proven Benefits

Symptoms: Superficial Venous Reflux

Physicians: S. Jamil, M.D., F.A.C.S.

Venous reflux is a normal reflex response that helps blood flow back to the heart.

Proven benefits include:

- Reduced leg pain
- Improved leg appearance
- Reduced swelling
- Reduced discomfort

Physicians: S. Jamil, M.D., F.A.C.S.

Your physician can assess and treat your varicose veins.

Vein Valve Failure

- Varicose veins
- Pain
- Swollen veins
- Discomfort

Symptoms: Superficial Venous Reflux

- Varicose veins
- Pain
- Swollen veins
- Discomfort
We are partners in care.

“It’s wonderful to work in the community in which you live.”

The Associates in Radiation Medicine (ARM), a physician group founded in the early 1990s, understands the importance of commitment to community. Dr. Donald Bridges, Dr. Anu Singh and Dr. Catherine Salem have enjoyed a long and productive relationship with Shady Grove Adventist Hospital.

Hospitals are the best partners, according to ARM’s founding physician, Dr. Bridges, because they are truly committed to patient care. Formal partners with Shady Grove since 1999, the group embodies the same passion for serving the community that is at the core of the mission of Shady Grove Adventist Hospital. The dedicated group of physicians that make up ARM have made it their goal to ensure that the best of care in radiation medicine is available to residents right here — so they don’t have to travel far from home for appointments and treatments.

ARM has grown over the years to now include 14 physicians, and they have made several generous contributions to Shady Grove, including substantial support to fund expansion of important initiatives and services in radiation oncology.

ARM’s commitment to the community is evident, not only in its sustained support of the hospital, but also in its philosophy as the practice has grown. The group makes it a point to hire physicians who want to grow with the practice and be part of the community. This is especially important because they often treat entire generations of families.

“We treat patients, their spouses, and the children of patients,” commented Dr. Bridges. This type of relationship and continuity, he added, “is good for our community.”
Looking Back:
Our Achievements

Throughout the past year, as a result of the generous support of our friends in the community, we at Shady Grove Adventist Hospital were able to introduce several new advancements, programs and tools that are making significant differences for our patients and their families. Also this past year, we received several designations, accreditations and awards, which further demonstrate our commitment to providing our community with the best care.

IN SURGICAL SERVICES
In August of 2010, orthopedic surgeons with The Joint Center at Shady Grove became the first in Montgomery County to use the Hana Table, a leading-edge tool for minimally invasive joint replacement surgery. This special operating table allows the surgeon to more effectively move the patient’s leg during surgery to best position the hip socket, ball and femur insert for proper fit. The Hana Table also allows the surgeon to take X-rays during the procedure to ensure precise fit and placement of all components. Anterior hip replacement is one of the newest procedures available to our patients needing hip replacement surgery.

Most patients who are candidates for traditional hip replacement surgery are also candidates for the anterior procedure. Patients benefit from the anterior approach to hip replacement in a number of ways. They can often more freely bend their hip and bear their full weight immediately or very soon after surgery. This leads to accelerated recovery time with fewer restrictions and less discomfort during the recovery period. Surgery is performed through one relatively small incision and there is less scarring. The Anterior Approach Total Hip Arthroplasty is minimally invasive and means faster healing, less time in the hospital and more rapid return to normal activity.
IN CARDIAC AND VASCULAR CARE
Shady Grove Adventist Hospital and Washington Adventist Hospital helped to purchase a new communications system for Montgomery County ambulances that will enable patients experiencing the most critical type of heart attack, an ST Elevated Myocardial Infarction (STEMI), to receive a faster diagnosis and treatment when they arrive by ambulance to the hospital. The system, called LifeNet, is a web-based software that allows emergency medical technicians to transmit electrocardiogram (EKG) results from the ambulance to the hospital staff for review and evaluation prior to the patient’s arrival in the emergency room. Prior to this advancement, results were communicated to hospital staff verbally via radio or phone.

In 2010, Shady Grove Adventist Hospital earned national recognition for Cardiac and Vascular Services by the American College of Cardiology Foundation for providing the best possible care to coronary artery disease and heart attack patients. Recognized as one of 135 hospitals nationwide — and one of just three in Maryland — Shady Grove was awarded the NCDR ACTION Registry-Get with the Guidelines (GWTG) Gold Performance Achievement Award for sustained and high level performance. In addition, Shady Grove Adventist Hospital’s Medical Library has earned the ACTION Registry-GWTG Gold Performance Achievement Award for 2010. GWTG is a database system through the American Heart Association that gathers quality data for cardiac care.

Also in 2010, Shady Grove Adventist Hospital achieved designation as a Cardiac Interventional Center (CIC) by the Maryland Institute of Emergency Medical Services and Systems and was granted continuation of its waiver to provide percutaneous coronary intervention (PCI) by the Maryland Health Care Commission. These designations recognize hospitals that demonstrate the highest quality cardiac care.

IN CANCER CARE
In the summer of 2010, Shady Grove Adventist Hospital announced it would build a state-of-the-art radiation oncology center in Germantown, expanding access to cancer treatment for upcounty residents. The center, located just off I-270 and Route 118, opened in April 2011, and provides the latest advances in treatment to cancer patients. Equipment includes a Linear Accelerator, which utilizes the latest technology for providing Image Guided Radiation Therapy (IGRT) using cone beam CT technology, allowing physicians to pinpoint and precisely target tumors, thereby sparing healthy tissue from being impacted by radiation.
Also in 2010, Shady Grove Adventist Hospital officially opened the Barbara Truland Butz Healing Garden. Located just outside the oncology unit, it offers a space for quiet reflection as part of the hospital’s holistic approach to the emotional, spiritual and physical needs of people in our care.

As part of mission-driven work to expand access to healthcare services for local residents, Shady Grove Adventist Hospital hosted free cancer screening events throughout this past year. Screening for cancer can result in earlier diagnosis and treatment and can literally save lives.

Shady Grove Adventist Hospital is honored to be the recipient of a Susan G. Komen for the Cure grant that will help provide comprehensive breast care services to medically underserved, low-income, minority women in Montgomery County. The program will provide specialized services to decrease the time between diagnosis and treatment. Shady Grove has also received a grant from the Avon Foundation to support expanded access to breast cancer screenings in the local community. This grant also works to link medically underserved women to breast health education and screening services.

**IN THE BIRTH CENTER**

In May 2010, Shady Grove Adventist Hospital became the first hospital in Montgomery County to implement standard pulse oximetry screening, which can detect congenital heart disease (CHD) in newborns. Pulse oximetry (pulse ox) is a noninvasive and painless procedure that is done 24 hours after birth, in conjunction with other newborn screenings. It measures the amount of oxygen in the blood, and may help identify CHD before an infant becomes critically ill. CHD is the most common birth defect, affecting eight of every 1,000 newborns, yet signs of the serious condition may not be visible immediately after birth.

Shady Grove Adventist Hospital was honored to receive an international award for lactation care — the International Board Certified Lactation Consultants (IBCLC) Care Award. Shady Grove became the first hospital in Maryland to receive this prestigious award. All lactation consultants in Shady Grove’s mother/baby unit are IBCLC nurses who specialize in clinical management of breastfeeding. Shady Grove Adventist Hospital delivers 5,000 babies each year and is home to a Level III Neonatal Intensive Care Unit, one of the highest designations granted.
Shady Grove became the first hospital in Maryland and the Washington metropolitan area to use a cutting edge therapy for pregnant women diagnosed with a rare blood clotting disorder. The disorder, called antithrombin III deficiency, puts a patient at 75 percent lifetime risk of clotting. The risk increases during pregnancy, delivery or any surgical procedure. The therapy, Thrombate III, was recently approved by the Food and Drug Administration (FDA) for obstetrical use for patients with hereditary antithrombin III deficiency. The medication is carefully dosed for each patient and delivered intravenously, drastically reducing the risk of clotting. Without the therapy, pregnancy and childbirth can be a life-threatening experience for the baby and/or the mother. Today, because of this therapy, patients at Shady Grove Adventist Hospital have healthy babies.

IN PEDIATRIC CARE
For children who may be facing surgery, enduring long outpatient treatments or fighting loneliness and boredom during long hospital stays, a new mobile entertainment unit brings smiles and lifts spirits. The Starlight Fun Center™ features a Sharp AQUOS™ LCD TV, DVD player, and Nintendo Wii™ games. The entertainment provides a much needed distraction, serving to help ease the isolation and fear many children often experience while in the hospital.

Shady Grove Adventist Hospital was recognized among top Maryland hospitals in identifying a common birth defect: hearing loss. Shady Grove’s hearing screening program for newborns has been rated as “distinguished” by the Maryland Department of Health and Mental Hygiene (DHMH). Hearing loss can significantly affect a child’s ability to develop speech, language and social skills. Identifying loss early can help offset developmental delays. Shady Grove’s program has been recognized as a model program for the state.

IN EMERGENCY CARE
Shady Grove Adventist Hospital received the full five-year, unrestricted re-certification as a designated EMS Base Station from the Maryland Institute for Emergency Medical Services System (MIEMSS). This allows emergency care teams at designated hospitals to use a radio system to provide consultations on patients to paramedics in the field, which means Shady Grove’s patients are receiving the best, expert care even before they arrive at the hospital.

IN NUCLEAR MEDICINE
Shady Grove Adventist Hospital’s Nuclear Medicine Services have been awarded a three-year term of accreditation in computed tomography (CT), or CAT scanning, by the American College of Radiology. This Gold Seal of Accreditation means the Nuclear Medicine department underwent a rigorous review and was found to provide the highest level of image quality and patient safety. Nuclear medicine procedures can help patients avoid surgery or more invasive tests, and often identify abnormalities very early in the progression of a disease.
Looking Ahead: Our Goals

Plans are underway for a new cancer center to be built on Shady Grove Adventist Hospital’s campus. The center will expand access to a wide range of coordinated services and will bring doctors, nurses, pain management specialists and complementary therapies together in one place to deliver exceptional, compassionate care.

When The Aquilino Cancer Center opens its doors in 2013, it will house the most advanced technology and leading-edge equipment to fight a range of cancers, including breast, lung, prostate, thyroid and colo-rectal cancers. Patients and their families will have access to expert clinicians in medical, radiation and surgical oncology, as well as essential cancer support services, including nurse navigation, social work, nutrition counseling, support groups and more. The centralized support resources and treatment options will allow cancer patients access to care and support in one convenient location, alleviating the stress associated with having to travel to multiple treatment locations.

Located within the Great Seneca Science Corridor, the center will benefit from valuable opportunities for collaboration on the latest cancer treatments, research and clinical trials.

A free-standing outpatient facility, The Aquilino Cancer Center is named for the Aquilino family of Potomac, Maryland, which has generously supported the center in memory of its beloved wife and mother.

“When you’re going through cancer, time is so valuable. You don’t want to spend that time commuting while maintaining a routine with your children, your work and the hospital,” commented Michael Aquilino. “I truly believe upper Montgomery County deserves and needs a convenient, high caliber cancer center.”
While the Aquilino Cancer Center is being built, immediate expansion of support services for cancer patients is underway. The Navigation Team at Shady Grove Adventist Hospital works closely with the medical team to see patients through the complex clinical and uniquely personal aspects and challenges of the cancer experience.

Shady Grove’s Navigation Team is moving to an expanded office in Suite 210 of 9711 Medical Center Drive. The new office will collectively house the nurse navigators, an oncology social worker and an oncology dietitian. The Navigation Team will focus on treating the whole person through expanded access to clinical, physical, spiritual and financial resources. This unique setting will include a patient/family conference room and resource library to support patient education and access to resources.

ADVANCES IN SURGICAL SERVICES
The da Vinci Surgical System is a computer-enhanced system that introduces a computer interface and 3DHD vision system between the surgeon’s eyes, hands and the tips of micro-instruments. The system mimics the surgeon’s hand movements in real time. The da Vinci System provides better visualization inside the patient’s body with natural depth perception, and up to 10x magnification for more accurate tissue identification. Improved visualization allows surgeons to handle and dissect tissue in confined spaces with added precision and allows the surgeon to minimize trauma to the surrounding anatomy.

Surgeons at Shady Grove Adventist Hospital will use the da Vinci System to provide safe and effective minimally invasive surgery for a range of complex conditions including:

- Bladder Cancer
- Colorectal Cancer
- Endometriosis
- Gynecologic Cancer
- Kidney Cancer
- Lung Cancer
- Prostate Cancer
- Throat Cancer
- Uterine Fibroids
- Uterine Prolapse
In addition, Shady Grove and Washington Adventist Hospitals are the first and only hospitals in the DC/Metro Area with a Robotics Skills Simulator. The simulator allows surgeons to train and enhance their robotic surgery skills in a non-clinical environment. It contains a variety of exercises and scenarios specifically designed to give users the opportunity to improve their proficiency. Users can practice unassisted or with supervision, according to their preference. The simulator is relevant to surgeons from any specialty. There are built-in metrics which enable users to assess skills, receive real-time feedback and track progress.

**ADVANCES IN CARDIAC AND VASCULAR SERVICES**

The Shady Grove Adventist Cardiac Rehabilitation Center is the second largest program in the state of Maryland. This center provides cardiac health and wellness classes, inpatient and outpatient cardiac rehabilitation and Enhanced External Counterpulsation (EECP) services. This impressive program is planning to expand its footprint on the hospital’s campus and projects that it will nearly double in size and capacity, providing expanded access to the community.

Shady Grove is also expanding its Vascular Services to meet the growing needs of the community. Shady Grove is recognized for its commitment to high level patient care and quality testing for the diagnosis of vascular disease, providing comprehensive diagnostic, interventional, and surgical vascular services. These services bring together vascular surgeons, interventional radiologists and cardiologists and include endovascular and open aortic repairs of both the chest and abdomen, carotid surgery and stenting and the latest in minimally invasive interventions. Our vascular diagnostic capabilities include the latest in vascular imaging, including ultrasound, CT and MRA. The vascular services team works closely with Shady Grove’s Diabetes Program and comprehensive Wound Care Center to combine the expertise of vascular surgeons, interventional radiologists, general surgeons, plastic surgeons, podiatrists and infectious disease doctors in a collaborative effort. Shady Grove will be expanding the vascular ultrasound department to provide a comprehensive vascular center.

**ADVANCES IN DIABETES CARE**

Shady Grove Adventist Hospital is expanding its Diabetes Education program to address this growing health epidemic. In addition to its inpatient treatment and support, the hospital is offering a new diabetes outpatient program that is accredited by the American Association of Diabetes Educators (AADE). The outpatient program provides comprehensive education and training to help people with diabetes learn how to better manage the condition, with tips on self-care, eating right and more. Classes are led by a diabetes education-certified dietitian and nurse, with interdisciplinary support from physicians, pharmacists and exercise physiologists.
The advances you have read about in this report, which have been responsible for life-changing outcomes for so many of our patients, have been made possible by generous donations from our friends in the community. Shady Grove Adventist Hospital Foundation is the fundraising vehicle for the hospital, charged with encouraging the community to contribute to the hospital’s quest to constantly grow and expand services. Gifts — large and small — mean that the best of care is right here, readily accessible to our families, our friends and our neighbors. Every single dollar donated to the Foundation goes directly to delivering and improving care.

In 2010, the Shady Grove Adventist Hospital Foundation was able to transfer over $1.1 million to the hospital and raised more than $2.4 million in new gifts and pledges.

The 25th Annual Golf Classic raised close to $350,000 to benefit Surgical Services. And the 2010 Employee C.A.R.E. Campaign raised over $100,000 in support of Complex Neurological Services. Also in 2010, Shady Grove Adventist Hospital gave in excess of $27 million in charity care directly to our community. This simply would not have been possible without the generosity of our partners and friends.

Support for Shady Grove Adventist Hospital takes on many forms. Some give by participating in fundraising events. Others leave a legacy of generous funding. And still others volunteer their time or their services in the hospital.

EVERY GIFT IS MEANINGFUL AND SUSTAINABLE.

$30 GIVES A CHILD A FREE FLU SHOT

$75 GIVES A WOMAN A FREE BREAST CANCER SCREENING

$150 GIVES A DIABETIC THE OPPORTUNITY TO LEARN HOW TO DEAL WITH THEIR DISEASE

$500 HELPS A NURSE TO FURTHER HER EDUCATION SO HE OR SHE CAN CARE FOR LOCAL RESIDENTS MORE EFFICIENTLY
Voices of Compassion

Every year, we see examples of support from our staff and our friends that overwhelm us with gratitude. These are just a few of the inspirational stories from this past year.

“HAPPY HOLIDAYS”
A SPECIAL TRADITION
The Pediatrics Unit at Shady Grove Adventist Hospital was full of gratitude this past holiday season for a member of our community who opened his heart and his wallet to help comfort children facing hospitalization.

For the tenth year in a row, Adrian Miller of Frederick delivered a van full of new toys to children at Shady Grove. He secretly asks the nurses for wish lists from patients every December, and delivers the gifts on Christmas eve.

An employee of The Washington Post, Miller said, “God gave me the chance to do something good. I am returning the favor.”

“My Voice Matters”
SONGS HELP TO HEAL
With a song in her heart, a Rockville teenager turned her talent into a compassionate gesture for pediatric patients at Shady Grove Adventist Hospital.

Richard Montgomery tenth grader Victoria Lopez designed a high school project as a charitable fundraiser. She played her guitar and sang while asking for donations for Shady Grove’s youngest patients.

Lopez kept the donation box sealed and opened it at the hospital with Adventist HealthCare’s Development Officer Teresa Witt and family friend Manuel Suarez, a long-time pharmacist at Shady Grove. That’s when Lopez learned she had raised $222! The money went to purchase a temporal thermometer.

“The nice thing is that this thermometer will allow us to take a temperature on the forehead while a child is sleeping,” according to Peggy Brooke, Shady Grove’s child life specialist. “It’s less invasive and less disruptive to their sleep, which is really important when kids are sick.”

“I DO”
A PATIENT’S WISH
More than 50 family, friends and staff joined together in Shady Grove Adventist Hospital’s chapel to celebrate a very special wedding.

A cancer patient, who was being treated at Shady Grove, and her husband fulfilled their wish to be “married in the eyes of God” by renewing their vows. Her nurses decided to throw a surprise wedding for the couple and a reception to follow in the hospital’s family lounge. They offered to do the bride’s hair and make-up and arranged donations for flowers, a cake and a catered dinner by Shady Grove’s Food Services.

“We’re so happy for the bride and groom,” said Fatu Fofana-White, RN. “She said she’ll never forget this day. In the end, she was exhausted, but she was so happy.”

A Special Thank You to our Anonymous Donors
Adventist HealthCare
Healthy Community Impact Fund

The mission of Adventist HealthCare (AHC) is to improve the health of people and communities through a ministry of physical, mental and spiritual healing. Every dollar donated through the Healthy Community Impact Fund (HCIF) is used to assist the community with its health needs.

The HCIF is an annual giving program designed to join with our efforts to improve the health of our friends, family and neighbors. This fund will streamline our efforts and create an opportunity whereby one gift will provide maximum support of the programs to all the entities across Adventist HealthCare.

Help us to continue to grow programs and services in the area of oncology, heart/cardiac, rehabilitation, behavioral health, and children and family services. For additional information or to join Adventist HealthCare in improving the health of our community, please contact Teresa Witt, Business Partner Development Officer at 301.315.3313.
Ways to Give

As a not-for-profit organization, Shady Grove Adventist Hospital directly applies every donation to caring for patients and delivering critical services throughout the community. The hundreds of gifts received each year help ensure that our hospital continues to provide the best facilities, treatments and clinical care.

THERE ARE MANY WAYS TO GIVE.

CONTRIBUTE ONLINE:
You can choose the amount and also the designation at any time by going to www.ShadyGroveAdventistHospital.com.

GIFTS OF APPRECIATED PROPERTY:
Those who enjoy making charitable gifts are pleased to learn that when appreciated property that has been held for more than 12 months (i.e., stocks, bonds, mutual funds, real estate) is donated, an income tax deduction is generally allowed based on the current value of the property rather than just its cost. This may provide greater tax benefits than a cash donation.

BEQUESTS:
Cash, securities, real estate, or personal property can all be given to charity through your will. By naming the hospital as a charitable beneficiary of your estate, you’ll become a member of our Heritage Society. Call and we will help you make arrangements.

CHARITABLE GIFT ANNUITY:
In giving, you will be receiving, for life! This is an opportunity to make a charitable gift to support Shady Grove Adventist Hospital and receive fixed annual payments for life. The payment amount is based on the age(s) of the payment recipient(s). The older the recipient(s), the larger the payments.

CHARITABLE LEAD TRUST:
A charitable lead trust can be created to provide income for a charity, such as Shady Grove Adventist Hospital, for a designated period of time (typically, 10 to 15 years). At the end of the designated number of years, it can be possible to transfer assets to your heirs while paying little or no gift or estate tax.

THE PRESIDENT’S CIRCLE OF FRIENDS:
This membership club includes esteemed individuals and businesses who donate an outright gift of $2,000 or more to Shady Grove Adventist Hospital in a calendar year.

COMMEMORATIVE GIFTS:
These gifts honor or are given in memory of a person important to you.

MATCHING GIFTS:
Many companies offer a matching gift program to their employees as a benefit. The company matches the employee’s donations to charitable organizations, such as Shady Grove Adventist Hospital.

VEHICLE DONATION:
Our Vehicle Donation Program is a free and convenient service for converting an extra car, truck or RV into a tax-deductible donation that benefits the hospital.

VOLUNTEERING:
Shady Grove Adventist Hospital seeks volunteers to help us provide our community with the best of care. Call 240.826.6111 for more information.

WORKPLACE CONTRIBUTIONS:
Shady Grove Adventist Hospital participates in the Combined Federal Campaign of the National Capital Area and the United Way workplace campaigns.

Additional gift options include Appreciated Assets, Cash, Named Funds, and even your own gift idea. If you’d like to make a contribution or would like to learn more about giving opportunities, please call us. For information, contact the Shady Grove Adventist Hospital Foundation at 240.826.6570 or visit www.ShadyGroveAdventistHospital.com.
In the 30 years since our inception, the purpose of the Shady Grove Adventist Hospital Foundation has been to raise funds to support Shady Grove Adventist Hospital.

These funds are transferred directly to the hospital to create and deliver critically needed programs and services and to purchase essential equipment. Though it is a not-for-profit entity, the hospital must still demonstrate a profit on an annual basis in order to acquire the latest equipment and attract and maintain top expertise. The Foundation is committed to the advancement of Shady Grove Adventist Hospital and its mission to provide healthcare excellence to the community we serve.

Our Mission

We demonstrate God’s care by improving the health of people and communities through a ministry of physical, mental and spiritual healing.

Our Values

RESPECT: We recognize the infinite worth of the individual and care for each one of us as a whole person.

INTEGRITY: We are above reproach in everything we do.

SERVICE: We provide compassionate and attentive care in a manner that inspires confidence.

EXCELLENCE: We provide world class clinical outcomes in an environment that is safe for our patients and caregivers.

STEWARDSHIP: We take personal responsibility for the efficient and effective accomplishment of our mission.

For more information on how to support Shady Grove Adventist Hospital, please contact the Foundation office at 240.826.6570 or visit www.ShadyGroveAdventistHospital.com.
“I thank you for your voices:

Thank you: Your most sweet voices.”

– WILLIAM SHAKESPEARE
