Award-Winning Care

We are accredited by The Joint Commission, the nation's leading healthcare accrediting agency, which reflects our commitment to providing the safest and most effective care possible.

We are the first acute rehabilitation facility in a five-state area to be accredited for our comprehensive, integrated inpatient rehabilitation programs by the Commission on Accreditation of Rehabilitation Facilities (CARF).

Amputee Program

Responsive: Our patients are welcomed into our hospital care as soon as possible after their injury or illness.

Our amputee program consists of two hospital stays. On average, we welcome patients for their second stay in 28 days.

Balanced: We understand the complexities that both men and women face in their rehabilitation.

Effective: Our patients achieve their goals in a short length of time so they can return home faster.

Average days of stay:

Results-oriented: In order to ensure the best outcomes, we measure how much each patient has improved each day. Our patients' daily improvement is among the highest in the region.

1% higher daily improvement than the average regional patient

Personalized: We treated patients ranging from 36 to 96 years of age in our amputee program, with the average being 67 years of age.

Compassionate: Our patients consistently report positive satisfaction ratings about our hospital and care to an independent auditor.

Customized: Our patients receive intensive rehabilitation therapy. Our amputee program patients on average participated in 16.1 hours of therapy a week.

Successful: More than 77 percent of our patients returned to their home after leaving our hospital.

Some patients' needs were best met by other support, including care in an acute-care hospital or in a skilled nursing facility.
